The MPLAN program is geared towards professionals and those seeking to add to their dossier of planning related education. It encompasses both the traditional planning and new frontiers in planning for public services, programs and projects. Courses are available on campus, through video conferencing, and on-line supervised reading courses.

Program
Graduates from this program will be awarded a Master of Planning. It takes approximately 3-5 semesters to complete, depending on the students ability to allocate time to complete 4.0 credits.
