

Computer Science: MSc, PhD

The School of Computer Science (SoCS) emphasizes both academic and applied research that can contribute to future research, industry partnerships and government programs. Interaction with other disciplines is encouraged and many faculty work with industry partners.

Program

The MSc in Computer Science is a thesis-based, two-year program during which students will complete five courses, give a public seminar, conduct research and successfully defend a thesis. We also offer the option to complete the MSc with a collaborative specialization in Artificial Intelligence or One Health.

The PhD in Computer Science is a full-time, four-year program during which students will complete the Technical and Communication Research Methodology course and two additional graduate courses. Students will also give two public seminars, pass a qualifying exam, conduct research and successfully defend a written dissertation at the final oral examination. We also offer the option to complete the PhD with a collaborative specialization in One Health.

Research Fields

- Artificial Intelligence
- Cybersecurity
- Human Computer Interaction
- Bioinformatics
- Applied Modelling and Theory
- Hardware & Distributed Systems

Application Deadlines:

Fall: June 1

Winter: October 1

Spring: February 1

The University of Guelph consistently ranks as one of Canada's top comprehensive universities. Graduate studies in the School of Computer Science will enable you to engage in groundbreaking research in a collaborative and supportive department.

Admission Requirements

MSc:

- Applicants require a four-year honours degree in computer science, or in another discipline with a minor in computer science.
- A minimum average of 75% during the last four semesters of full-time study.

PhD:

- A recognized master's degree in computer science (or a closely related discipline) that includes a thesis or a major independent project.
- A minimum average of 75% during the last 2 years of full-time study.

Faculty and Facilities

The School of Computer Science at U of G has professors that are at the cutting edge of their fields. We offer courses that cover a wide range of topics and provide competitive financial incentives to eligible students.

Our students are highly coveted by local industry. They are leading software development teams, providing eHealth innovations (such as the widely acclaimed Iron Tracker mobile application) and working at the cutting edge of data science and machine learning.

ARE YOU INTERESTED IN:

- Advanced Algorithms
- Data Analysis
- Design Patterns
- eHealth Innovation
- Machine Learning

CAREER OPPORTUNITIES:

- Data Engineering
- Machine Learning
- Software Development
- User Interface Analysis
