Family Relations and Applied Nutrition: MSc, PhD
Family Relations and Human Development

Family Relations and Human Development is a field of study offered by the Department of Family Relations and Applied Nutrition. We are a unique, interdisciplinary academic unit focused on integrating research and practice.

uoguel.ph/frhd

The field of Family Relations and Human Development (FRHD) offers an MSc and a PhD, which involve a combination of course work and a research thesis. For the PhD the completion of a qualifying exam is also required.

Research Capacity
Building on core theory and methodology courses to support thesis work, this scientist-practitioner orientation prepares graduates to pursue an academic or professional career in a variety of settings.

Admission Requirements

- An honours bachelor's degree, or equivalent
- A minimum 75% average in the last 2 years of study
- Grades of at least 75% in applied statistics and social science research methods courses
- For PhD, master’s degree with a research-based thesis

Application Deadline: January 7, 2022

Eligibility
We welcome students with diverse backgrounds such as psychology, sociology and other social sciences, healthcare, applied health, health promotion, human development, cultural and Indigenous studies, sexuality and gender studies, education and developmental sciences.

Anya is conducting her Family Relations and Human Development MSc research with families of children diagnosed with Functional Neurological Symptom Disorder (FNSD). In particular, Anya’s goal is to qualitatively explore how parents of youth who received this diagnosis make sense of it, and how new living conditions affect the family. This research aims to inform clinical practice and help in development of psychoeducational support for families with FNSD.
