

Family Relations and Applied Nutrition: MSc, PhD

Family Relations and Human Development

Family Relations and Human Development is a field of study offered by the Department of Family Relations and Applied Nutrition. We are a unique, interdisciplinary academic unit focused on integrating research and practice.

[uoguel.ph/frhd](http://uoguelph.ph/frhd)

The field of Family Relations and Human Development (FRHD) offers an MSc and a PhD, which involve a combination of course work and a research thesis. For the PhD the completion of a qualifying exam is also required.

Research Capacity

Building on core theory and methodology courses to support thesis work, this scientist-practitioner orientation prepares graduates to pursue an academic or professional career in a variety of settings.

Admission Requirements

- An honours bachelor's degree, or equivalent
- A minimum 75% average in the last 2 years of study
- Grades of at least 75% in applied statistics and social science research methods courses
- For PhD, master's degree with a research-based thesis

Application Deadline:

January 7, 2022

Anya is conducting her Family Relations and Human Development MSc research with families of children diagnosed with Functional Neurological Symptom Disorder (FNSD). In particular, Anya's goal is to qualitatively explore how parents of youth who received this diagnosis make sense of it, and how new living conditions affect the family. This research aims to inform clinical practice and help in development of psychoeducational support for families with FNSD.

Eligibility

We welcome students with diverse backgrounds such as psychology, sociology and other social sciences, healthcare, applied health, health promotion, human development, cultural and Indigenous studies, sexuality and gender studies, education and developmental sciences.

Faculty

Dr. Kim Anderson
 Dr. Lynda Ashbourne
 Dr. Andrea Breen
 Dr. Susan Chuang
 Dr. Adam Davies
 Dr. Tuuli Kukkonen
 Dr. Scott B. Maitland
 Dr. Robin Milhausen
 Dr. Michèle Preyde
 Dr. Carla Rice
 Dr. Tricia van Rhijn
 Dr. Kimberley Wilson

ARE YOU INTERESTED IN:

- Child, Adolescent and/or Adult Development and Aging
- Gerontology
- Parent-Child and Family Relations
- Human Sexuality
- Program Evaluation, Intervention and Research Methodology

CAREER OPPORTUNITIES:

- Direct service or supervisory capacity in government
- Community and human services
- Academia
- Private sector or public agency work
- Research related positions

Family Relations and Applied Nutrition: MSc, PhD

Applied Human Nutrition

Applied Human Nutrition is a field of study offered by the Department of Family Relations and Applied Nutrition. We are a unique, interdisciplinary academic unit focused on integrating research and practice. Our faculty members conduct applied and inter-professional research that encompasses the continuum of the life cycle in diverse settings, including public health, the community, and clinical settings.

uoguelph.ahn

The field of Applied Human Nutrition (AHN) offers a MSc and a PhD, which involve a combination of course work and a research thesis. In the case of a PhD, the completion of a qualifying exam is also required.

Research Expertise

Graduate students have opportunities to conduct independent research from inception to analysis in community, lab and clinical settings using nutrition, epidemiological and/or social science methodologies.

Admission Requirements

- An honours bachelor's degree, or equivalent
- A minimum 75% average in the last 2 years of study
- Grades of at least 75% in applied statistics and social science research methods courses
- For PhD, master's degree with a research-based thesis in human nutrition or a closely related field

Application Deadline:

January 7, 2022

Mackenzie is competing her MSc in FRAN in the field of Applied Human Nutrition. Her research is using knowledge mobilization strategies to develop novel, family-based nutrition education strategies designed to increase the dairy consumption of preschool-aged children as part of the Guelph Family Health Study. Mackenzie hopes to follow her MSc with a doctoral degree in community or global nutrition.

Eligibility

Individuals from an applied human nutrition discipline and those who have non-AHN backgrounds are encouraged to apply to the MSc and PhD options in the AHN field. We welcome students with diverse backgrounds such as applied human nutrition, nutritional sciences, food science, biomedical science, health promotion, psychology, and kinesiology.

Faculty

Dr. Andrea Buchholz
 Dr. John Dwyer
 Dr. Dalia El Khoury
 Dr. Laura Forbes
 Dr. Jess Haines

Applied Human Nutrition Faculty and Research Areas

Andrea Buchholz PhD, RD

I have three research streams: (1) Body composition and energy expenditure. I am the Director of the University of Guelph Body Composition Lab, and a co-investigator of the Guelph Family Health Study, with a research interest in children's and parents' body composition. (2) Dietary intakes of families, with a focus on calcium and dairy product intake. (3) The use of patient simulations in the education of undergraduate and graduate students in nutrition.

Research Interests: body composition (obesity), nutrition and dietary intakes of families, and the scholarship of teaching and learning.

John Dwyer PhD

My overarching research interest is health promotion, particularly the promotion of healthy lifestyle behaviours such as physical activity, non-sedentariness (less sitting), and healthy eating among adults and adolescents. Several specific areas of research interest are (a) psychology of physical activity, sedentariness, and healthy eating, (b) promotion of dog walking, and (c) program evaluation related to physical activity, dog walking, sedentariness, and healthy eating.

Research Interests: psychology of physical activity, sedentariness, and healthy eating; dog walking; program evaluation.

Dalia El Khoury PhD, RD

My research interests lie in the areas of 1) exploring new biomarkers for the metabolic syndrome, and their modulation by functional foods and/or physical activity, both in pediatric and adult populations; and 2) investigating the prevalence and psychosocial determinants of dietary supplement use among university athlete and non-athlete students, gym exercisers and other populations at risk.

Research Interests: functional foods; the metabolic syndrome; biomarkers; nutrition education, and designing and implementing relevant nutrition education programs; dietary supplements.

Laura Forbes PhD, RD

My research focuses on dietary intake during key developmental periods (adolescence, pregnancy) with the goal of preventing chronic disease, specifically, diabetes and obesity. Current projects focus on the health effects of dietary sugar intake during pregnancy, educating health care practitioners about how to discuss gestational weight gain and intake of unhealthy foods among university students.

Research Interests: nutrition, pregnancy, adolescence, carbohydrates, sugar, diabetes, obesity.

Jess Haines PhD, RD

My research focuses on identifying modifiable family-level factors that influence children's health behaviours and translating that knowledge into effective behaviour change interventions. I am the Co-Director of the Guelph Family Health Study, a cohort study of families with preschool-age children, and the Director of the Parent-Child Feeding Laboratory where we aim to understand how parent-child feeding interactions influence children's dietary intake.

Research Interests: families, children, obesity prevention, behaviour change intervention, parent-child feeding interactions.

Claire Tugault-Lafleur, PhD RD

My research emphasizes healthy eating in children and youth and is shaped by my background as a registered dietitian, fusing methods and theory from nutrition education, public health, behavioral and implementation sciences.

Current projects include examining the dietary practices of the Canadian children using large population-based surveys, understanding factors influencing the nutrition, physical activity and sedentary behaviours of children in childcare settings, and testing the feasibility and scalability of mHealth (mobile health) interventions targeting children and adolescents.

Research Interests: population-based dietary assessment, dietary quality, children and adolescents, obesity prevention, schools, childcare, mHealth.

Family Relations and Applied Nutrition: MSc

Couple and Family Therapy

Couple and Family Therapy is a field of study offered by the Department of Family Relations and Applied Nutrition. We are a unique, interdisciplinary academic unit focused on integrating research and practice.

uoguelph/cft

The MSc CFT field of study is two years (24 continuous months) in length. Students will complete a Major Research Paper. Graduating students will meet all the requirements to become a Registered Psychotherapist (Qualifying) with the College of Registered Psychotherapists of Ontario (CRPO).

Research Expertise

Research approaches include qualitative (e.g., discourse analysis, grounded theory, narrative analysis) and quantitative methods.

Admission Requirements

- An honours bachelor's degree or equivalent, typically including coursework in psychology (particularly developmental psychology), sociology, social work, and/or family relations
- A minimum 75% average in the last 2 years of study
- Grades of at least 70% in applied statistics and social science research methods courses
- Personal maturity and relevant work/volunteer experience

Application Deadline:
November 22, 2021

Rachel is a student in the FRAN MSc program in the field of Couple and Family Therapy, researching spirituality in practice. Their major research project focuses on incorporating spirituality and religion into the therapeutic setting as a resource for adult survivors of adult sexual trauma. Their work examines themes of meditation, prayer, and community-building within particular spiritual communities, and provides considerations for therapist training.

The MSc program in the field of Couple and Family Therapy is a recognized education and training program with the CRPO and has provisional accreditation with the Canadian Association for Marriage and Family Therapy (CAMFT).

The course of study combines academic courses, research, and supervised clinical training including completion of 500 hours of direct clinical contact and over 100 hours of clinical supervision in the on-site family therapy clinic and during the final semester externship placement.

Faculty

Dr. John Beaton
Dr. Ruth Neustifter
Dr. Olga Smoliak

ARE YOU INTERESTED IN:

- Family Therapy and Discourse Analysis
- Sexual or Gender Minorities
- Sexual Issues
- Romantic and Family Relationships
- Families with Children with Disabilities and Chronic Health Conditions

CAREER OPPORTUNITIES:

- Private practice
- Community based agencies
- Family health teams
- Hospitals and mental health facilities
- Educational institutions

Master of Applied Nutrition: MAN

The Master of Applied Nutrition (MAN) program is the only one-year graduate practicum program of its kind in Ontario. This unique interdisciplinary academic program prepares students to work in a practical setting by combining theory, empirical knowledge and professional skills. This dietetic education program is accredited by the Partnership for Dietetic Education and Practice (PDEP) and prepares students for eligibility for registration with a provincial dietetics regulatory body.

uoguel.ph/man

Program

The MAN program consists of three components:

- Practicum placements
- Research Portfolio
- Graduate course work

Admission Requirements

Students applying to the MAN program must have:

- An honours degree within the previous three years from a dietetic program accredited by PDEP
- A minimum average of at least 75% in the last two years of their undergraduate program
- Grades of at least 75% in applied statistics and social science research methods courses
- These requirements may be in progress at the time of application but must be completed by April 30
- Please see website for additional program requirements

Application Deadline:

December 13, 2021

Master of Applied Nutrition, 2019-2020 cohort

EXPERIENTIAL LEARNING OPPORTUNITIES

University of Guelph is centrally located. Diverse training experiences include hospitals, family health teams, private practice dietitians and large national organizations. Four students will complete their practicum training in clinical nutrition at the Grand River Hospital (Kitchener) each year.

ARE YOU INTERESTED IN:

- Dietetic entrepreneurship
- Health promotion
- Sports and/or clinical nutrition
- Food service administration

CAREER OPPORTUNITIES:

- Dietitian working in primary, acute or long-term care
- Quality improvement
- Public health dietitian
- Nutrition researcher
- Private practice dietitian

Master of Applied Nutrition: MAN

GRADUATE SPOTLIGHT

Jessica B.

Registered Dietitian, Wellness and Sustainability Manager,
Queen's University

Education:

- MAN (University of Guelph)
- BAsC Applied Human Nutrition (University of Guelph)
- Food and Nutrition Management Diploma (Canadore College)

Areas of Interest:

- Foodservice administrative work
- Data/product analysis

Continuing at Guelph:

After completing her undergraduate degree at Guelph, Jessica maintained ties with the university as a research assistant with Dr. Laura Forbes. It was during this time through discussions with Dr. Forbes that she became interested in the MAN program. "The more I talked about it with her, the more I loved it."

About the program:

Although she had an idea of what to expect in the program through discussions with faculty, the program exceeded Jessica's expectations.

From the course work completion of a PEN (Practice-based Evidence in Nutrition) Knowledge Pathway, to publication of her research project and feeling much more confident in facilitation and public speaking.

Faculty and cohort support:

Support from faculty and her cohort reinforced Jessica's drive and confidence in not only her course work but as a future professional. Being asked on an ongoing basis to aid in the continuation of the MAN program through the use of her course work as exemplars for the new cohort, participation in interviews and orientation for the new cohort has built Jessica's confidence in her abilities.

Current Employment:

Since October 2017, she's been working as a registered dietitian and wellness manager at Queen's University, where she helps students with unique nutritional requirements.

Jessica works closely with campus chefs and hospitality staff to provide healthy meals for students and cater to their diverse dietary needs, which range from students with food allergies or sensitivities to those who follow vegetarian or vegan diets.

"I am the go-to person for allergy management," says Jessica, "I work with students to help them navigate what they can and can't eat to keep them safe".

WHAT OUR GRADUATES SAY

"I think the reputation of the MAN program and diversity of the experience that I had set me up for success in my current position allowing me to become one of the senior clinical dietitians."

– Paula, 2003 MAN Graduate

"The MAN program has opened my eyes to other areas in dietetics where I could work and the creativity in finding my own career path. Dietetics is always changing, it is a field with continued learning."

– Sheree, 2017 MAN Graduate

"Each and every one of my placements were unique and contributed valuable experiences. I found all of my preceptors to be excellent mentors; they were very knowledgeable and supportive of my needs and goals as a dietetic intern."

– Nicole, 2016 MAN Graduate

Why MAN?

- Master-practicum combined program completed in 3 semesters
- Application of classroom learning to placement, all in the same week
- Creation of practicum pathways with individual career objectives in mind
- Academic diversity with students from institutions across Canada
- Networking opportunities to support career development
