

Rural Planning and Development: MSc (Planning)

Planning and Development are processes that permeate most human activities. Practitioners may be found working in a wide range of contexts – public and private sectors as well as not-for-profit organizations. Our program emphasizes planning for resilient rural, Indigenous, and remote communities in Canada and Internationally. Our graduates are highly successful in securing employment in the field.

uoguelph.ca/sedrd

Program

This MSc program is available as a thesis option, major paper option, or course work option. The intensive (6 semester) program is accredited by the Canadian Institute of Planners.

Research Fields

The Master of Science in Planning program offers students the ability to specialize in either Canadian or international context. Further, students are able to complete research in:

- (i) community and social development,
- (ii) land use planning, (iii) resource and environment planning, (iv) rural policy, and (v) Indigenous planning.

Admission Requirements

The minimum requirement for admission is a four-year Honours degree (or equivalent) with an average of at least second class honours (B- in the last four semesters (or two years) of study).

Application Deadline:

Departmental review of applications is completed by March 31, 2022.

After that date, admission will be based on availability of space.

Faculty

For 40 years, the Rural Planning and Development program has been offering graduate degrees aimed at building the resilience of small towns, Indigenous, and remote communities. Our programs focus on agri-food systems, climate changes, economic development, international planning, and natural resources management. Our faculty are nationally and internationally recognized for their scholarship, leadership, and contributions to rural planning and development.

Scholarships and Funding

Scholarship and research assistantships are available annually to incoming students. The program also provides travel and research support to MSc students.

Rural Planning and Development: MPLAN

The Master of Planning program is designed for individuals with at least two years of experience seeking to add key skills and capacities in rural planning and development. The program provides the core competencies required for planning and development and facilitates flexibility to ensure students select options that build on their current skills and knowledge. Courses can be taken on campus or online.

uoguelph.ca/sedrd

Program

The Master of Planning program consists of 4.0 credits and takes approximately 2-3 semesters to complete. The program can be completed in either full-time or part time studies.

The Master of Planning degree may be used as part of the Prior Learning Assessment route to accreditation with the Professional Standards Board.

Research Fields

The Master of Planning program offers students the ability to specialize in either Canadian or international context. Further, students are able to complete research in:

(i) community and social development, (ii) land use planning, (iii) resource and environment planning, (iv) rural policy, and (v) Indigenous planning.
