Master of Cybersecurity Leadership and Cyberpreneurship: MCLC

Business leaders are recognizing that cybersecurity isn't just about strong technical skills, but also qualified leaders who can manage their cybersecurity teams and drive strategies for business operations. Delivered jointly by the University of Guelph's computer science school and business faculty, the program equips students with a unique understanding of cybersecurity from a business lens.

Program

The Master of Cybersecurity Leadership and Cyberpreneurship (MCLC) is a course-based master's program that offers both a full-time and a part-time option. The MCLC can be completed full-time in one year (3 semesters, or 12 months) or part-time (between 24 and 36 months), and is designed to cater to busy working professionals seeking to grow in their careers. Hybrid learning maximizes flexibility through asynchronous and synchronous online learning combined with an annual on-campus intensive. The MCLC requires completion of 4.00 graduate credits, including a Professional Seminar in Cybersecurity.

Subject Areas

- Entrepreneurship and cybersecurity
- Privacy management and governance
- Leadership
- Organizational change
- Project management

Application Deadline:
Ongoing

Entry: Fall

Admission Requirements

- Applicants require a four-year honours degree with a minimum 70% or B- average.
- A minimum of 3 years of relevant professional experience.
- Statement of Interest: Applicants must outline their interest in their field of study and state their objectives for undertaking a Master's program in their Statement.
- An English proficiency test is required for applicants whose first language is not English.

Canada Cyber Foundry (CCF)

The MCLC is associated with the University of Guelph's Canada Cyber Foundry. The CCF aims to bridge the digital divide where organizations lack sufficient cybersecurity resources, leading to degraded visibility and increased risks.
