

Engineering: MEng

Shaping the Global Engineer

With strengths in some of the most globally impactful areas of study, U of G Engineering is actively educating engineers who will shape the world of tomorrow.

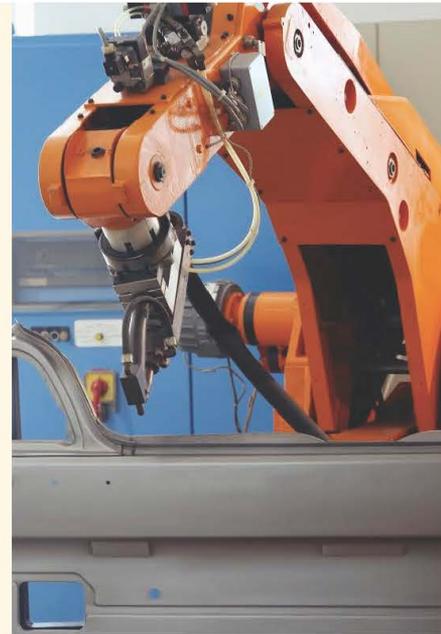

We are proud to offer several graduate degree choices where our research is diverse and multi-disciplinary. Guelph Engineers are applying their expertise and knowledge to research and consulting projects all over the world. As well, many have gone on to academic careers at some of the most prestigious institutions. Their experiences here have been key in preparing them to have a positive impact wherever they've chosen to go.

What makes U of G Engineering unique is our focus on fostering a truly collaborative environment where the next generation of researchers are working to solve some of the critical questions that will shape the answers to issues facing both the local and global communities.

Building on our tradition of sustainability and design, the MEng program offers opportunities for advanced training in some of the most globally important fields of study. Thematic areas of study offered are:

- Mechanical Engineering
- Biomedical Engineering
- Water Resources Engineering
- Environmental Engineering
- Computer Engineering
- Engineering Systems and Computing
- Biological Engineering

The MEng is coursework-based and can be taken as a full-time or part-time program of study. The coursework option provides graduates with a fuller understanding of engineering principles and a better grasp of their application to the solution of complex, practical problems.

Admission Requirements

In addition to the general admission standards of the university, the School of Engineering has adopted additional admission criteria for MEng studies:

- Applicant must be a graduate from an honours program with at least a 70% average in the past four full semesters or the last two complete undergraduate years.
- Applicants must have demonstrated an acceptable analytical ability by having taken a sufficient number of courses in mathematics and in physical sciences. A background in undergraduate engineering courses is a prerequisite for the MEng Program.

Minimum requirements are located @ www.uoguelph.ca/engineering/graduate
